

New appliances and products should perform their function – washing clothes, keeping food cool, providing light, making a good cup of coffee – using as little electricity as possible.

But there are big differences in energy consumption of the products and appliances available in shops – **how can consumers choose the best ones?**

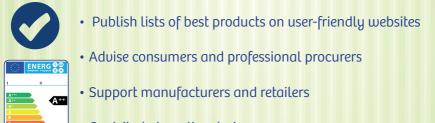

Find Europe's best products in more than 15 product categories at www.

Topten is a market transformation tool. Based on the European energy label and eco-design requirements, the Topten teams:

Contribute to policy design

Topten network's **impacts**:

Stakeholders make better decisions and get recognition: consumers, procurement officers, retailers, manufacturers, policy makers, NGOs, utilities, institutions, the media Savings per year: 600 GWh €120 million 276 000 tons of CO,
